Uncontainable – ISEA2011 Istanbul: Some Thoughts After The Fact

When talking about ISEA2011 Istanbul one of the things I believe will remain as a legacy of the symposium is its magnitude. ISEA2011 was the most attended to date with almost 1500 attendees, the last count we had was of 1489, and it had over 100 artists – the ones we could account for – who participated and engaged with the city in multiple ways, authorized and non.

Overall ISEA2011 responded to the idea that we crafted for the event: a sprawling series of art events, exhibitions, initiatives, encounters, talks and performances that would reflect the sprawling uncontainable nature of the city of Istanbul. It was also about the ‘uncontainable’ nature of contemporary digital media which cross over physical borders and interfere with the local cultural order. These interferences may at times have generated conflicting relationships but in doing so also spurred development and innovative approaches.

ISEA2011 Istanbul proved how the lines and borders of contemporary national states present the observer with ideological and cultural frameworks that are no longer valid. Concepts of identity, cultural identifiers, nation state and belonging as well as place and time are challenged in both real and virtual contexts.

As Artistic Director for this exhibition – together with Özden Şahin, the Program Director – I wanted to showcase the complexity of contemporary social interactions and the role that technology is playing in redefining contemporary aesthetics.

The exhibition Uncontainable was part of the official Parallel Program of the Istanbul Biennial, which allowed participating artists and curators to provide diverse perspectives on the contemporary developments within fine arts aesthetics.

For this reason I am very grateful to all of the artists and delegates that supported ISEA2011 Istanbul through what at times was a difficult process in a difficult economic climate. Turkey does not have public funding for the arts – as for example in European countries – and ISEA2011 Istanbul was made possible through a long string of private sponsorships, institutional support and donors that we solicited.

In the end the variety of the venues and programs provided a colorful framework and allowed artists to engage not only with one another and the public but also with the Istanbul Biennial, with the art market held during two wonderful boat journeys across the Bosporus and with the city of Istanbul itself.

For the first time in the history of ISEA an electronic art exhibition program was officially part of the parallel program of an international biennial. The exhibition with its artists was publicized in the press package of the 12th Istanbul Biennial together with initiatives and events dotted across the city and internationally.

Therefore the art program was conceived as an artistic itinerary across the city that placed art events in proximity to the major touristic attractions of the city, creating an electronic/new media/digital layering that would interact with the socio-political history of the city. The art program did not limit itself to the ISEA conference period – September 14 to 21, 2011 – but continued with its events until November 2011.

The catalog becomes a way to place an order to all of the events and activities, creating a record of the artists participating and the invited curators, to whom I am extremely grateful for their contributions. It is a snapshot of the city and of the event itself, which has signed, we hope, a milestone in the history of the ISEA Foundation.

Kilian Ochs was born in 1980, in Pforzheim (Germany). He grew up in a family of workers and technicians. His early interest for the reality of pure logic, combined with a need for distinct expression, brought him to writing, and in 2002, at the age of 22, he was ready to start his studies in the Department of Philosophy at the Karlsruhe University of Arts and Design. However, feeling the urge to get closer to the obstructive challenges of materiality, he decided to change the department after one semester, and to study Media Art. He graduated in 2010.

For several years now, he has been dealing with the development of his own theory of systems, and with the challenges that derive from shaping systematic procedures into material. With Sphere 12/16, one of his latest projects, he built his first object which both theoretically and aesthetically achieves the goal of melting logical thoughts and resistant material together.

Sphere 12/16 was built during a stay in Tallinn (Estonia) from 2009 to 2010. The artist wants to express his gratefulness to all his friends there who supported and helped him on this project, above all to Leho Reiska and Erik Alalooga.

The artist lives and works in Karlsruhe (Germany) and Tallinn (Estonia).

I believe that there is a reality of systems, which is the counterpart to the reality of usefulness in an anthropocentric sense. The systematic reality is vital and self-referential.
